Summary: At Mokoia Intermediate for our school we aim to provide opportunities for all students to ignite their passion in learning. We will do this by delivering a meaningful and relevant curriculum drawn largely from our own local context and mātauranga Māori. Consultation has been done with our community through surveys, teacher conferences and hui.

The foundation of our school is relationships. Respectful relationships are the key to effective learning. Research results stress the need for teachers to be caring, to have high expectations of students, to know what students need to learn and to know how individual students learn best. These are the principles our teaching team are committed to.
